

# IRBCOIN WHITEPAPER v1.2 (EN)

“It’s Really Bullish.”

## ■ Introduction

The internet is tired of every coin claiming to be “the next big thing.” IRBCOIN doesn’t claim anything. It *is* the next big thing — precisely because it doesn’t try to be. IRBCOIN (\$IRB) was born out of the need to bring back what Wall Street can’t copy: irony, community, and fun.

## ■ What is IRBCOIN?

IRBCOIN (IRB) is a community-driven meme coin on the Solana blockchain, blending humor, self-awareness, and bold visual identity. It’s a tribute to everyone who can still smile — even in the middle of a crypto winter. “It’s Really Bullish.” — Everyone who’s seen the IRBCOIN logo.

## ■ Philosophy

IRBCOIN doesn’t promise a revolution. It promises vibes, memes, and a community that acts because it can – not because a whitepaper told it to. The soul of crypto has always been in the people. IRBCOIN exists to bring meaning back to memes, give the community control, and build a story people actually want to be part of.

## ■ Technology & Chain

Network: Solana Standard: SPL Token Transactions: Lightning-fast Fees: Ridiculously low  
IRBCOIN leverages Solana’s scalable infrastructure and ultra-low transaction costs. The community can use the token across the meme economy — in NFT rewards, campaigns, and future “bullish” features.

## ■ Tokenomics

40% – Liquidity: Fair launch — open for the community, LP managed to support growth and development  
25% – Team: Maintenance, development, and long-term motivation  
17.5% – Community & Airdrops: Meme contests, rewards, and participation bonuses  
17.5% – Marketing: Viral campaigns, meme bounties, and social hype  
■ Surprise burns incoming – because nothing is more bullish than unpredictability.

## ■ Narrative: “The Real Bullish Energy”

IRBCOIN is more than just a token — it’s a feeling. It’s that moment when everything around you crashes, but IRB stays... bullish. No one knows why it works — and that’s exactly why it does. “IRBCOIN doesn’t need a roadmap. It’s already on the way.” — IRB Community

## ■ Community & Brand

The heart of IRBCOIN is its people — IRB Nation. An open invitation to all creatives, meme artists, and crypto anarchists who understand the art of irony. ## ■ Launch Phases

1. Genesis – Whitepaper, logo, and community foundation 2. Token Launch (Solana) – Fair launch for the community 3. Airdrop & Meme Challenge – Early campaigns to build IRB Nation 4. Brand Expansion – NFT drops, collaborations, and merch 5. The Memeverse – The community builds the future — we just sparked it.

## ■ Legal Disclaimer

IRBCOIN is a meme coin, not a financial product. It is created for community entertainment, not investment promises. All holders of IRBCOIN are part of the community — not in any contractual or debt relationship with the project.

## ■ Final Words

IRBCOIN doesn't need promises. It only needs memes, community, and bullish energy. "No promises. Just vibes." — \$IRB Certified by ChatGPT – AI Design Authenticator (Document updated: IRBCOIN Whitepaper v1.1 EN, October 2025)
